**Pakistan Tourism
Development Corporation (PTDC)**

Welcome to Pakistan

The Land of Adventure and Nature

From the mighty stretches of the Karakorum's in the North to the vast alluvial delta of the Indus River in the South, Pakistan remains a land of high adventure and nature. Trekking, mountaineering, white water rafting, wild boar hunting, mountain and desert jeep safaris, camel and yak safaris, trout fishing and bird watching, are a few activities, which entice the adventure and nature lovers to Pakistan.

PTDC

Pakistan Tourism Development Corporation

Pakistan Tourism Development Corporation (PTDC) is public sector Corporation, incorporated in March, 1970 under the Companies Act 1913 (Now Companies Act 2017). It is governed through its Board of Directors. PTDC functions as a national tourism organization, supporting federal government entities, provincial tourism departments and the private sector to promote sustainable and inclusive tourism growth in Pakistan.

Its key functions include:

- Promotion of Pakistan at national and international levels as a premier tourism destination.
- Coordination with provincial tourism departments, private stakeholders, and relevant federal entities to harmonize tourism development efforts.
- Development and implementation of national tourism standards and guidelines to ensure quality and consistency across the country.
- Act as Pakistan's lead coordinating agency for engagement with global and regional tourism bodies, including the UN Tourism Organization and other relevant forums.
- Support Ministry of Inter-Provincial Coordination (IPC) in the implementation of bilateral agreements and Memoranda of Understanding (MoUs) related to tourism.
- Act as National Center of Excellence for Tourism, supporting evidence-based policymaking and sectoral planning.
- Promotion of capacity building and human resource development in tourism and hospitality sectors, with focus on professionalism and service excellence.

Global Tourism Economy

The World Travel & Tourism Council (WTTC) is a leading global authority that conducts and publishes comprehensive research on the economic and social impact of the travel and tourism sector, in collaboration with Oxford Economics. The cornerstone of WTTC’s research is its annual Travel & Tourism Economic Impact Reports, comprising one global report, 24 regional reports, and 184 country-specific reports. These publications are widely recognized as authoritative reference documents for policymakers, industry stakeholders, and international organizations worldwide.

Since the onset of the COVID-19 pandemic in 2019, WTTC reports have assumed heightened importance as key indicators for assessing post-pandemic recovery and the overall performance of the tourism sector. Although the industry has demonstrated strong recovery momentum, it is only recently approaching its pre-pandemic benchmarks. Consequently, 2019 continues to serve as the primary baseline for comparative analysis across tourism-related studies and assessments. According to WTTC’s latest annual research released in 2025, the global travel and tourism sector continued its upward trajectory, with its contribution to global GDP estimated at approximately 10.3% in 2025, reflecting sustained growth over 2023. This indicates that the sector is now nearing, and in some regions surpassing, pre-pandemic (2019) levels, marking a significant milestone in global tourism recovery.

In terms of employment, the sector is estimated to have supported over 366 million jobs worldwide in 2025, demonstrating continued expansion and resilience. This represents further growth compared to 2023 and signals that global tourism employment has largely recovered to, and in some cases exceeded, 2019 levels. The report also provides updated projections for long-term forecasts extending to 2035, offering valuable insights into future trends in global GDP contribution, employment generation, and the evolving dynamics of the travel and tourism industry.

Pakistan Tourism Growth and Economy

According to the World Travel & Tourism Council’s (WTTC) latest Travel & Tourism Economic Impact Report 2025, Pakistan’s travel and tourism sector continues to demonstrate strong resilience and sustained growth. Building on the recovery momentum of previous years, the sector further strengthened its contribution to the national economy in 2024, maintaining an upward trajectory toward long-term expansion.

In 2024, the sector’s contribution to GDP is estimated to have increased beyond the 5.8% recorded in 2023, reflecting continued growth driven by rising domestic tourism, improved international arrivals, and enhanced policy focus on tourism development. This growth indicates that the sector has not only recovered from the impacts of the COVID-19 pandemic but is also progressing steadily beyond pre-pandemic (2019) benchmarks.

In terms of employment, the travel and tourism sector are estimated to have supported over 4.79 million jobs in 2024, further increasing its share in national employment. This continued rise highlights the sector’s vital role as a key driver of job creation and economic inclusion across Pakistan.

Furthermore, the report presents updated projections for 2025 and long-term forecasts extending to 2035, offering a forward-looking assessment of the sector’s contribution to Pakistan’s GDP and its share in national employment. These projections provide critical insights into the future trajectory of Pakistan’s tourism industry and reinforce its growing importance in the country’s overall economic development.

Pakistan Travel & Tourism Sector Characteristics

Tourism expenditure in Pakistan varies between international and domestic visitors and is broadly divided into leisure and business travel. According to WTTC's Travel & Tourism Economic Impact Report 2025, international visitor spending continued to grow in 2024, reflecting sustained recovery and increased inbound tourism.

Leisure travel remains the dominant segment, rising from 89.9% in 2019 to 91.6% in 2023, while business travel declined to 8.4%. This trend is expected to continue into 2025, highlighting a strong shift toward leisure-driven tourism in Pakistan.

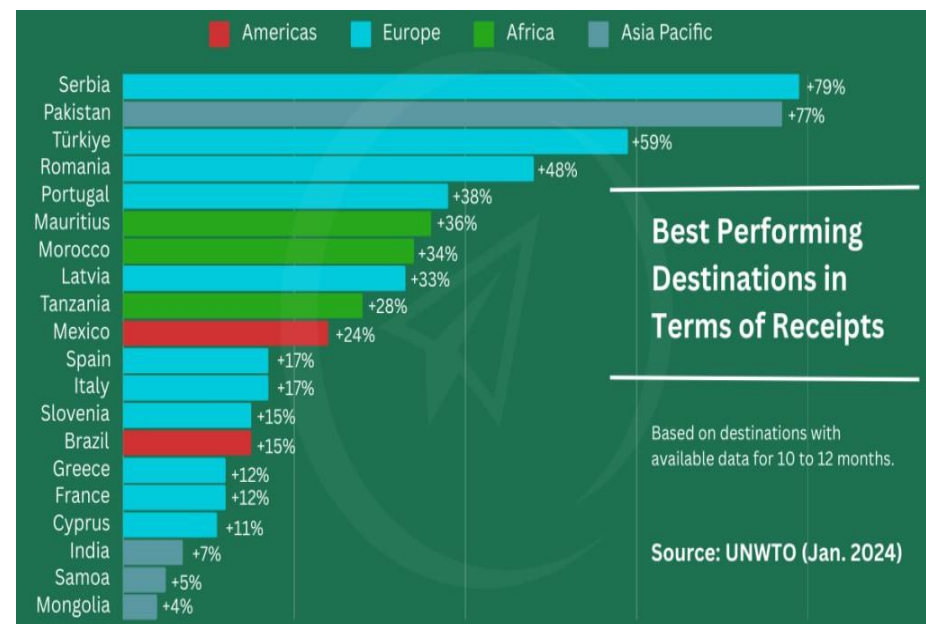

Source: WTTC

Pakistan Position on Tourism Competitive Index

According to UN Tourism's latest analysis (2025), global tourism receipts continue to show varied recovery trends compared to 2019 across regions. Despite ongoing challenges, several destinations have recorded strong growth.

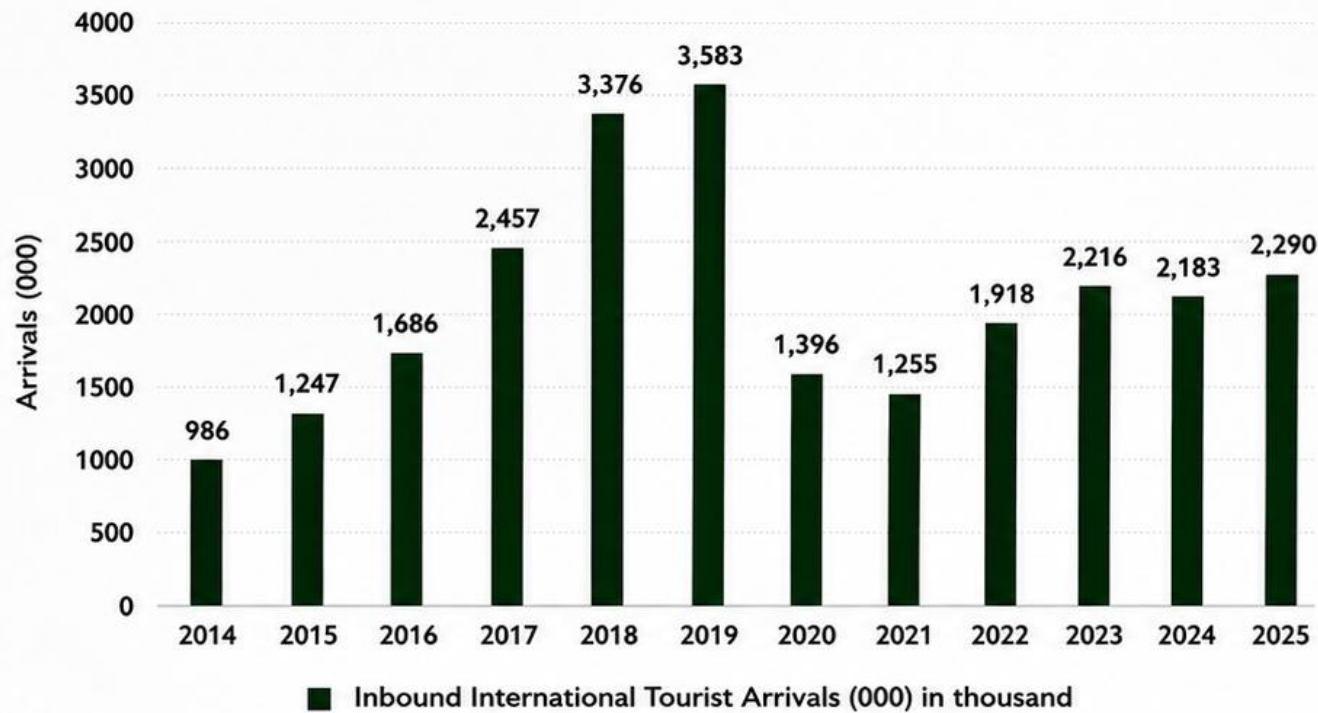

Notably, Pakistan remains among the top-performing destinations, with tourism receipts significantly exceeding pre-pandemic levels, reflecting its strong recovery and growing appeal in the global tourism market.

Inbound Travel & Tourism

TOURISM IN PAKISTAN

INBOUND TRAVEL & TOURISM Inbound Country Wise Arrivals Year 2014-2025

Continuous growth was recorded in international tourist arrivals in Pakistan up to 2019, increasing **from 986,000 in 2014 to 3.583 million in 2019.**

The country also gained significant global recognition, being featured by CNN and Forbes, while Condé Nast Traveler listed Pakistan among the "Best Holiday Destinations," and the British Backpacker Society ranked it among the world's friendliest countries.

In 2020, the COVID-19 pandemic severely impacted the sector, with international arrivals dropping sharply to **1,396,000**, causing unprecedented disruption to the tourism economy.

Since then, Pakistan's tourism sector has shown gradual recovery. By 2025, international tourist arrivals reached 2.29 million, reflecting steady growth supported by improved security, enhanced connectivity, digital visa facilitation, and increasing global interest in cultural, adventure, and mountain tourism. While still approaching pre-pandemic levels, this upward trend signals renewed confidence in Pakistan as a leading tourism destination.
